

# Rocketry at the Boys & Girls Clubs

Over June, July and August this summer, cadets and seniors from Pilgrim Squadron hosted five rocketry programs, three at the Boys & Girls Club of Plymouth and two at the Club in Marshfield. The campers built and launched more than 500 rockets, some several times. Cadets helped Summer Campers build soda straw, soda bottle and Estes model rockets and supervised as the kids launched them. Older children signed “Good Decisions” pledges, which we mailed to kids’ parents along with an anti-drug pamphlet and a letter explaining the program.
