

# Cadets get glider rides

On September 10, Pilgrim cadets piled into the van and went up to Springfield Vermont for rides in gliders.

Each CAP cadet got two rides. They were given training on piloting the aircraft and assisting in the launches, called "Wing Running."

A certified glider instructor pilot accompanied the cadets during their flights, which lasted up to about a half hour each.

Pictures show cadets being trained, waiting their turns, after the rides, and "wing running."

Rides are scheduled to resume in the spring.
