

Intra-squad rocketry

The two teams (guys vs. the girls) built 19 rockets for the competition. Some of them were quite unique, such as the black rocket lying flat in the lower right of the picture. The Barbie rocket (right picture) was the overall winner, having launched five times in the second round and several in the first round.

The girls' team won both first and second rounds. The girls showed more dedication and creativity. The guys had spirit and gave the girls a good run.
