

A day at Norwood Airport

On Wednesday, April 20, Pilgrim cadets and seniors spent the day at Norwood Airport where they learned about aerodynamics and airport operations.

The crowd-pleaser was a 30-minute trip in the full-motion simulator (top), a complete flight from takeoff to landing.

A tour of the Cessna Citation included sitting in the pilot's seat (right) and a look at the parts of the jet (upper right).

An air traffic controller talked informally with the cadets (lower right) prior to their visit to the tower (bottom).

They also visited the maintenance shop.
